

Satuan Acara Pengajaran

ECON10100 - Pengantar Ekonomi 1

Pengajar

Prof. Suahasil Nazara S.E., M.Sc, Ph.D

Tujuan Perkuliahan

This course is meant to provide students with basic knowledge in economics. The course starts with principles of economics and how to think like an economist. Having completed this course, students are expected to understand the basic logic of microeconomics such as demand and supply, markets, the concept of elasticity and its application, consumer's problem, production and market efficiency. Students will also be exposed to different real life examples of government policies related to taxation, subsidy, industrial organization, and labor issues.
